Tangerang, Banten, 15730, ID | 85162903656

Specialist in building scalable web and mobile apps using React Native, Flutter, and Next.js. Proficient in PHP and SQL. Focused on delivering high-impact, user-centric solutions that align with modern business objectives and efficient AI-driven development.

Education

Institut Teknologi Indonesia

Sep 2015 - Feb 2020

Bachelor of Engineering Informatics

Projects

Raksa TransMet

Sep 2020 - Aug 2025

Developed a mobile app enabling marketing teams to record activities, request business cards, stationery, Grab registration, and manage reimbursements — streamlining administrative processes and improving operational efficiency.

ESPK

Feb 2022 - Aug 2025

Created a mobile app for surveyors to efficiently conduct car surveys, select parts, and upload images as proof — enhancing accuracy and documentation.

Web-Based Reporting Tools

Jan 2021 - Aug 2025

Built a web platform for generating, filtering, and exporting custom reports (Excel/PDF), including marketing performance KPIs — empowering data-driven decisions and performance tracking.

Raksa Partner

Aug 2022 - Feb 2023

Designed and implemented an agent-focused app to manage new policy offers, renewals, survey requests, towing services, and claim monitoring — supporting smoother agent operations.

Raksa Online

Feb 2023 - Jun 2023

Developed an app for policyholders to manage policies, submit claims, request marketing or CS assistance, and access towing services — improving customer engagement and self-service options.

Underwriting Approval

Mar 2023 - Nov 2023

Built an approval app for marketing heads and directors to review and approve policy proposals — accelerating approval workflows and ensuring compliance.

Smart Underwriting

Nov 2023 - Dec 2024

Created a web app for underwriting teams to manage offers, quotations, and voting processes — supporting informed underwriting decisions.

Catatan Keuangan

Mar 2025 - Mar 2025

Developed an internal financial note-taking web app to assist teams in tracking and managing financial records securely.

SGP Guard

Aug 2025 - Present

Developed a security workforce management app featuring geofenced attendance and automated SOS alerts for immediate local response. Integrated modules for patrol/incident reporting, leave management, and digital payslips. Streamlines operational security, personnel coordination, and real-time supervisor communication through a unified interface.

Gumilang Mobile

Nov 2025 - Present

Developed a workforce operations app featuring geofenced attendance and multi-stage task documentation. Includes integrated modules for activity reporting, leave management, and digital payslips. Features an automated SOS system broadcasting real-time incident alerts to nearby colleagues and supervisors for rapid response.

HRIS

Dec 2025 - Present

Developed a local Human Resource Information System (HRIS) designed to support employee management and daily HR operations. The system includes features such as attendance tracking, leave and permission requests, payroll slip viewing, employee data management, and reporting.

Secure App

Jan 2026 - Feb 2026

Developed an Android-based biometric identification app (R&D stage) integrating fingerprint, face, iris, and UHF scanning. Features QR/barcode support and passport reading via OCR/MRZ/NFC. A unified interface for secure identity verification, biometric enrollment, and document authentication through specialized hardware-assisted modules.

POS Platform

Mar 2026 - Present

Multi-tenant web-based POS platform for retail and restaurants, featuring multi-outlet management, role access, and integrated SRM for supplier coordination. Includes efficient cashier transactions, kitchen displays, and guest ordering. Designed to streamline operations and business scalability through robust, impactful solutions.

e-Layanan Paspor KJRI Hongkong

Aug 2025 - Present

A mobile app for Indonesian citizens in Hong Kong, providing consulate service booking, immigration requirement guides, schedule management, news updates, and document forms — streamlining access to KJRI services for PMI, students, and permanent residents.

Work Experience

Mobile Developer

Aug 2025 - Present

PT Himalaya Indo Karya | Tangerang Selatan, Banten

Developed mobile applications based on user needs and requests, including adding new features, debugging issues, and solving technical problems — improving application functionality, usability, and overall user experience

Develop mobile applications based on user needs and business requirements

Analyze application requirements and system workflows
Implement and enhance required application features

Full Stack Developer

PT Asuransi Raksa | Jakarta

Sep 2020 - Aug 2025

Built and maintained mobile and web apps for insurance operations. Designed APIs, databases, and reporting tools. Added features based on user needs. Collaborated across teams to deliver efficient, user-friendly solutions that support business goals and processes.

Creating Mobile Applications According to User Needs

Analyze Application Requirements

Create an API that will be used for Apps

Adding the necessary features

Create reports related to data processed in Apps Web Based

Creating databases and queries to be used by Apps
